Welcome to our global platform, where rehabilitation science becomes an immersive digital experience

Rehabilitation science made simple

Rehub brings the latest in rehabilitation science directly to you through a diverse array of digital formats. Engage with the content and community that make learning both insightful and interactive.

Insightful Podcasts

Dive into the latest rehabilitation trends with podcasts crafted by leading experts in the field.

ConnectLive Sessions

Experience real-time interaction with professionals during our streaming events and live sessions.

Stories & Resources

Each topic is also supplied with extra materials to give even more depth on the subject.

Discussion Channels

This is where our members interact among each other and with our experts to discuss rehabilitation practices and more.

Currently most popular topics in the ReHub app

In collaboration with the leading minds in the field, every month we launch a new topic on rehabilitation. Every topic includes a podcast, story, additional materials and a chance to meet the expert behind the topic in an online AMA session.

Nicole Kimberley-Saeheli

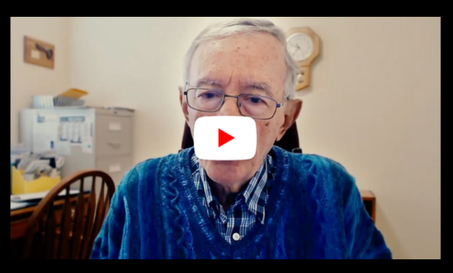
The topic outlines a trauma-informed care approach for corrections professionals, emphasizing the importance of recognizing and mitigating the re-traumatization risks in the criminal justice system.

Rob Canton

The topic discusses the value and purpose of probation in the criminal justice system, emphasizing that its effectiveness is not only about reducing reoffending, but also upholding social justice and human rights.

Shadd Maruna

The topic explores the concept of desistance in correctional practice, focusing on the process by which individuals desist from criminal behaviour.



James Bonta

This topic discusses the Risk/Need/Responsivity (RNR) model, which is a framework for reducing recidivism among individuals who have committed crimes.

Join our ever growing community as we proceed to making ReHub app the go-to place for rehabilitation practitioners from all over the world.
